ALT+1000 Festival - Juan Arias exhibition

In partnership with Alt +1000 Festival, in an outdoor exhibition along the Taillères Lake, SMArt presents some artworks of Juan Arias about the wolf. To discover from 29. August to 20. September 2021.

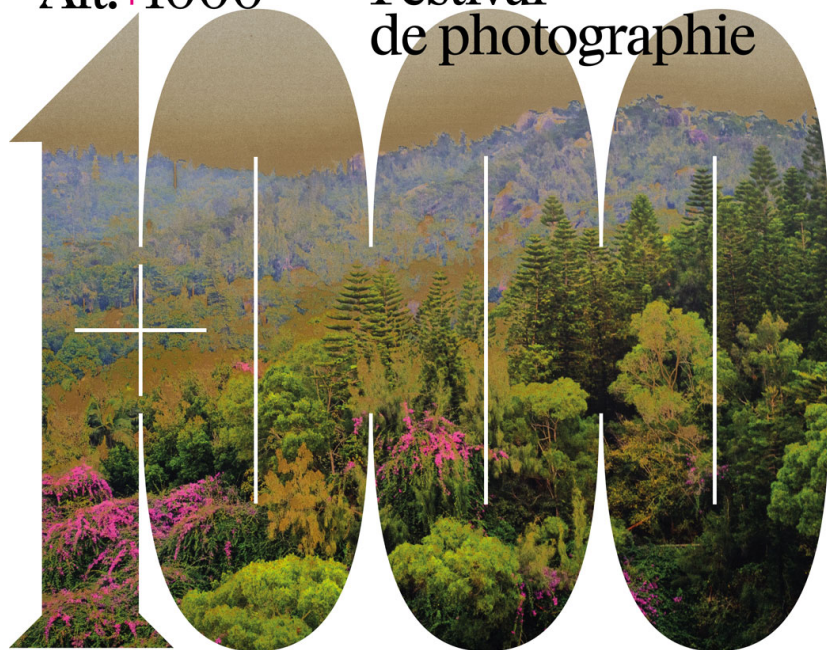

For its 6th edition, the photography festival Alt.+1000 invites you to an encounter with nature and its landscapes that irrigate the fullness of the soul. « Beautiful landscapes settle in the feelings » wrote Jean Giono. Many have discovered them as a revelation during the months of the pandemic that allowed only one leisure activity, the encounter with nature.

A source of life and enchantment, sometimes the cause of disasters and fright, nature was thus revealed, if not recalled, to the conscience of mankind. In three locations, the festival proposes to continue this encounter with artists who present their interpretation of nature.
