Exhibition « impACT » - a dialogue between a retrospective of SMArt program and archival documents

The exhibition « impACT. What is our footprint? The photos testify » is a societal perspective, through images from yesterday and today, of what we have done and are still doing to our environment. In the light of a retrospective of the SMArt programme and historical visual testimonies preserved by the Médiathèque Valais - Martigny, the dialogue between archival documents and contemporary photographs restores what constitutes our present and invites us to consider the future differently.
