# Exhibition - We are together - M'hammed Kilito

---

In the framework of his residency M'hammed Kilito dealt with the theme of migration in Valais, through the visual sociology approach that characterizes his work. He questioned the political and social realities of migrants by producing three photographic series that weave narrative threads: the first focuses on the objects and memories brought back by migrants as well as on their homes or places of work; the second presents exchanges of knowledge or shared knowledge between migrants and Swiss residents; the third tells the daily life of migrants through the activities organized by the Intercultural Space of Sierre.
