Juan Pablo Marin presents his crystal view of the Alps in Colombia

After his 3 months' stay in the Swiss Alps (Goeschenen, Uri), Juan Pablo Marin presents his exhibition in Cali Colombia. The fruit of the mountains - as he likes to call the crystals that lie in the rocks of the mountains - inspired him for his artwork. With series of crystalseekers' portraits and landscapes made through filter of crystals, he offers a glimpse of the people lifestyle in the mountains who love these precious stones and respect the nature.

His exhibition is to be discovered from 11 October to 11 November 2019 at Lugar a Dudas in Cali, Colombia.
