# Mulhouse Biennial of Photography - Ce soir, la lune rêve avec plus de paresse

---

The fifth edition of the Mulhouse Biennial of Photography, Corps Célestes, evokes a fascination with the cosmos, the stars and the imagination which accompanies them. The artwork of three SMART artists will be exhibited : "Ce soir, la Lune rêve avec plus de paresse" presents the points of view of Xiaoyi Chen, Stephanie Montes and Jorge Panchoaga. During their three-month residency in Valais (Switzerland), these photographers focused on what connected them to nature, revealing in the process the enchantment of the sky and the celestial objects inhabiting it and inviting us to be amazed by their captivating splendour.
